## LPG Upgrade Kit

### Craftsman

The Regulators are ideally suited for the mobile light trade. Flexible tip allows the operator to get into tight places. The HARRIS mixing system uses gas at much lower pressures which provides gas savings and increased safety. Operator's will enjoy the front mounted valves, providing the ability to alter flame one handed. Also includes Reg-End Flashback Arrestors and Flashguards on Handle.

Includes 10 metres of 6mm Harris Oxy/LPG Hose.

**Part No 193660117**

### Contractors Gaugeless

As above with larger regulators Model 818 which are ideal on the back of trucks and utes as there are no gauges to be damaged.

**Part No 19368187**

**Complies to ISO 5172 AS 4267 AS 4839 Standards**

### Contractors

Model 801 regulators with large diameter easy to read gauges. Hard hats are available to protect the gauges whilst on the back of a truck or a ute.

**Part No 193680117  
193680127 (Side Entry OXY)**
