Rapidstick 8577 Anaerobic Thread Sealant

PART NUMBER	AVAILABLE SIZE
8577-50	50ml Tube
8577-250	250ml Tube

PRODUCT DESCRIPTION

Chemtools[®] Rapidstick 8577 Anaerobic Thread Sealant offers immediate low pressure resistance for all metal threads on pipes, joints, and fittings, locking and sealing to resist loosening and leakage during testing, and after cure. It has WRAS approval for Potable Water, and protects against corrosion, shock and vibration. 8577 will not creep, shrink, gall, migrate, or block systems.

Rapidstick 8577 is an anaerobic sealant suitable for use on stainless steel threads without the need for surface activation. It is ideal for sealing against gases, water, LPG, hydrocarbons, oils, and other chemicals, and its excellent thixotropic property prevents migration of the sealant before or during curing.

DIRECTIONS (READ LABEL BEFORE USE)

All surfaces must be clean, dry, and free of dust and grease. It is recommended to prime inactive metals first with *Chemtools® Rapidstick 8-3471 Anaerobic Adhesives Primer*.

Apply a single bead of sealant to the leading threads of the male fitting, leaving the first thread free.

Ensure all threads and voids are filled. Add further sealant if necessary.

Apply another bead of sealant to the female threads.

Assemble and tighten as required.
