CELLAR SIGN PACK

The cellar sign pack contains all of the signage required by AS5034 in one handy pack. It was developed so that installers upgrading an installation with new beverage equipment to meet AS5034, could meet the requirements of that standard for signage as well. The pack includes non-flammable and non-toxic gas signs, and labels for carbon dioxide pipes, nitrogen pipes, carbon dioxide vent pipes, cold water pipes and isolation valves. Also included are danger signs and "RESERVE" and "IN USE" placards with chains to hang around the cylinders. All signs and labels are made from long wearing and fade resistant materials.

BLP	Cellar Sign Pack

CONNECTION LEADS

Cylinder connection leads deteriorate over time through wear and tear. As a result, they should be inspected and leak tested every 6 and 12 months. Tesuco carry a range of replacement lead assemblies. They are all manufactured using virgin PTFE liners with double stainless steel wire braiding and a protective coating around it. All leads are manufactured and cleaned for food grade. A number of different soft seal hand connections and lead styles are available.

Specifications	
Maximum Working Pressure	20,000 kPa
Length	1 m
Inlet Connection	Type 30 Hand Wheel or Easyfit
Outlet Connection	1/4" BSPT Male
Anti-Whip Cable	Stainless Steel

Part No	Description
HCD10WH	Flexible CO ₂ Food Grade Lead with Anti-Whip and Hand Wheel
HCD10WEF	Flexible CO ₂ Food Grade Lead with Anti-Whip and Easyfit
HCD10WHN	Flexible CO ₂ Food Grade Lead with Anti-Whip, Hand Wheel and NRV
