

BEAVER ROUND SLINGS

Round slings are an all-purpose lifting sling enabling a strong and non-damaging lift of its load. They are extremely light in weight and flexible in multiple directions, allowing easy and quick manipulation even when fragile loads are being lifted. Round slings are a continuous loop made from polyester yarn encased in a sleeve of polyester or Nylon fabric. The sleeve is so constructed that it protects the internal rows of yarn filament and keeps them in a parallel formation at all times.

The yarn fibre (core) is free to spread out where the Round sling is in contact with its load. This provides a broad support, which cushions the load against damage and reduces slipping. The low stretch characteristics of the polyester yarn also prevent 'load bounce' when hoisting very heavy weights.

- Manufactured to AS 1353
- Test Certificate available on request
