

POST MIX PRODUCTS - TWIN REGULATOR PANEL

Tesuco Post Mix panels are specifically engineered to meet AS5034. They feature two high pressure regulators (fully plated inside with stainless steel seats to prevent corrosion) with delivery pressure gauges on each regulator. Each outlet has an isolation valve, a non-return valve and a large volume relief valve which are vented for non-naturally ventilated areas. It is connected to the cylinder by a one metre high pressure connection lead with an anti-whip cable and soft seat hand wheel.

MEETS AS5034

Specifications	
Maximum Working Pressure	20,000 kPa
Delivery Pressure	0 – 800 kPa at Each Regulator
Inlet Connection	CO ₂ : Type 30 Stem and Hand Wheel
Outlet Connection	5/8-18 UNF RH with Nut and 6 mm Hose Barb
Relief Valve	Set at 880 kPa
Panel	2 mm 304 Stainless Steel

Part No	Description
RCCDPM800	Post Mix Regulator Assembly with High Flow Relief Valves, Isolation Valves and Non-Return Valves on Each Outlet and High Pressure Connection Lead with Soft Seal Hand Wheel. Supplied as Standard with 6 mm Hose Barb.

WINE DISPENSE PRODUCTS – TWO STAGE REGULATOR

Tesuco wine dispense regulators are specifically engineered to perform the exacting requirements of dispensing bottled wine. It features two regulators, the first to reduce cylinder pressure down to approximately 600 kPa and the second to give an accurate delivery pressure that will not vary. Outlet pressure is 0-30 kPa. This is vital when dealing with bottled wine in dispensing machines, which cannot be subjected to higher pressures. Over pressure is also protected by a high and low pressure relief valve. The regulators are fully plated inside and out with stainless steel seats to prevent corrosion, they also have European food grade certification. There is a cylinder contents gauge and a delivery pressure gauge.

Specifications	
Maximum Working Pressure	20,000 kPa
Delivery Pressure	0 – 30 kPa
Inlet Connection	M10 x 1 with Type 50 Stem and Nut Supplied
Outlet Connection	5/16" Push Fit
Relief Valves	Set at 800 kPa and 40 kPa

Part No	Description
RIM2NI05	Wine Dispense Regulator with Type 50 Inlet, Relief Valves and 5/16" Push Fit Outlet
