UNIMIG®

BUILT FOR WELDERS

SHADE CONTROL

Automatic welding lens allows the operator to switch between variable welding shades from 9-13.

GRIND MODE

Allows the operator to switch the helmet from the welding mode into a fixed shade for grinding. This function removes the need for the operator to change visors and to simply use the welding helmet for grinding when required.

2 ARC SENSORS

Maintain constant sensing and automatically switches the helmet from light to dark and back again.

TRUE COLOUR VIEW

True Colour View Lens Technology greatly improves the optics of your helmet, letting you see a full spectrum of colours. It also helps to reduce eye fatigue making it safer for extended periods of welding.

LIGHTWEIGHT & COMFORTABLE

The lightweight design makes wearing the welding helmet more comfortable for longer periods.

SUITABLE FOR

MIG

TIG

STICK

PLASMA

GRIND

TECHNICAL DATA

SKU	UMTWH
Filter Dimensions	110x90x9mm
View Size	96x42mm
Arc Sensors	2
Classification	1/1/1/2
Light State	4
Dark State	9-13
UV/IR Protection	DIN15
Time from Light to Dark	0.1ms
Time from Dark to Light	0.1-0.9s

TECHNICAL DATA

Sensitivity Delay	Adjustable (Internal)
Power Supply	Solar Cells
Warranty	2 Years
Operating Temperature	-10°C to 65°C
Storage Temperature	-20°C to 85°C
Shade Control	Yes (External)
Grind Mode	Yes (External)
TIG Amperage	5A
Standards	CE, ANSI, CSA, AS/NZS
